# Rohan Choudhary

Software Engineer | AI Applications | Game Development
+91 9903140983 | rohan5210work@gmail.com | linkedin.com/in/rohanchoudhary5210 | github.com/rohanchoudhary5210

## Summary

Software Engineer with 1+ year of professional experience shipping production features in Godot and Unity in a 6-member team. Builds full-stack, AI, and blockchain applications with Python, React, JavaScript, SQL, and Solidity. B.Tech in Computer Science (Data Science), CGPA 8.0. Strong in data structures, algorithms, object-oriented design, and debugging.

## Technical Skills

**Languages**: Python, C#, Java, JavaScript, TypeScript, SQL, C/C++, Solidity, GDScript
**Web and Backend**: React, Material-UI, REST APIs, HTML, CSS
**AI and Data**: Generative AI, Prompt Engineering, Pandas, NumPy, Speech Recognition, Claude Code
**Game and Blockchain**: Unity, Godot, Unreal Engine, Physics Simulation, Smart Contracts, Ethers.js, Polygon
**Cloud and Tools**: AWS, Google Cloud, Firebase, Git, GitHub, Linux, VS Code, Visual Studio, Figma

## Experience

**Gamewise, Capsitech** **Jul 2025 – Present**
*Junior Game Developer (L1)* *Jodhpur, Rajasthan*

- Shipped multiple games in Godot and Unity; built 5+ gameplay features in GDScript and C#, lifting engagement 20%.
- Reduced crash rate by 15% by optimizing game mechanics and improving the debugging workflow.
- Integrated 30+ assets into the production pipeline while working in a 6-member cross-functional team.

**Ekwik Solutions** **Mar 2025**
*Artificial Intelligence Specialist (Contract)* *Pasighat, Arunachal Pradesh*

- Taught AI and robotics to 50+ high school students and mentored them to build 10+ AI prototypes.

**CityGO** **Jan 2023 – Mar 2023**
*UI/UX Design Intern* *Haldia, West Bengal*

- Designed Figma prototypes for a logistics app and ran usability tests with 15+ users, improving task completion by 25%.

## Open Source Contributions

**GodotFirebase** (Firebase SDK for Godot Engine) | GDScript, OAuth 2.0, Firebase Auth | PR #497 (Merged) **May 2026**

- Added Google Play Games sign-in to the auth module by implementing the OAuth 2.0 authorization-code login flow.
- Built a PlayGamesProvider class and refactored OAuth login for provider-specific requests.

## Projects

**Asset Dependency Visualizer** (Godot 4 plugin) | GDScript, Graph Algorithms | GitHub **Aug 2026**

- Editor plugin that scans scenes, scripts, and resources and maps asset dependencies as an interactive graph.
- Finds circular dependencies (Tarjan's SCC), duplicate assets (SHA-256 hashing), and unused assets for cleanup.

**Sprite StaticBody Builder** (Godot 4 plugin) | GDScript, Computational Geometry | GitHub **Sep 2026**

- Turns any 2D sprite into a StaticBody2D with pixel-accurate collision in one click, simplified via Ramer-Douglas-Peucker.
- Splits concave outlines into convex parts to prevent physics glitches; adds shadows fixed to world lighting.

**Localization Package** (Unity) | C#, Unity Editor Scripting | GitHub **Feb 2026**

- JSON-based localization for 6 languages with runtime switching, plus editor tools that localize a whole scene in one click.

**NFT-Based Toll Booth System** | React, Solidity, Ethers.js, Polygon | GitHub **May 2025**

- Decentralized toll system where NFT-based FASTags pay tolls via 3 Solidity smart contracts on Polygon testnet.

## Certifications

Unity Essentials Pathway (Unity, 2025) | Google AI Essentials (Google, 2025) | Understanding Data Concepts (Microsoft, 2025) | AWS Solutions Architecture Job Simulation (Forage, 2024) | Google Cloud Computing Foundations (Google Cloud, 2024)

## Education

**Haldia Institute of Technology** **Sep 2022 – Jul 2026**
*B.Tech in Computer Science and Engineering (Data Science)* *CGPA: 8.0*

## Leadership

Chairperson, Data Science Club, HIT (5+ workshops, 120+ students) | PR Head, NEEDS (3+ drives, 200+ people)
